Why your vacation in a ECST area

The Appennino Tosco Emiliano National Park has chosen since 2014 to adhere to the Europarc Federation "ECST - European Charter for Sustainable Tourism in Protected Areas", to give itself a practical tourism management tool geared toward realizing environmental, social and economic benefits for visitors and the host community

Since 2022, the Park has obtained the commitment of local businesses in helping to make its protected area a sustainable destination.

Frame the QR CODE with your smartphone and find out through the faces and words of ECST tourism businesses and tourism workers what it means to commit to sustainable tourism.

Through three-year programs, ECST businesses pledge to use environmentally friendly products, encourage customers to respect and learn about the environment, carry out energy-saving activities, reduce, recycle and properly manage waste, promote local products, and tell the stories of places.

ECST enterprises make commitments and put their signatures to it
